SCOPE

We solicit high-quality papers in the broad area of combinatorial algorithms. Topics include, but are not limited to: Algorithms and Data Structures (incl. sequential, parallel, distributed, approximation, probabilistic, randomised, and on-line algorithms); Algorithms on Strings and Graphs; Applications (Bioinformatics, Music Analysis, Networking, and others); Combinatorics on Words; Combinatorial Enumeration; Combinatorial Optimization; Complexity Theory; Computational Biology; Compression and Information Retrieval; Cryptography and Information Security; Decompositions and Combinatorial Designs; Discrete and Computational Geometry; Graph Drawing and Labelling; Graph Theory.

SUBMISSION

Authors are invited to submit an extended abstract of no more than 12 pages in LNCS style, including references. A clearly marked Appendix can be included, which will be read at the referees' discretion. All submissions have to be made via the EasyChair page for the conference. No simultaneous submission to other conferences with published proceedings is allowed, and submitted papers should not be under review by a journal during the whole refereeing process. At least one author of each accepted paper will be expected to attend the conference and present the paper.

PROCEEDINGS AND SPECIAL ISSUE

The conference proceedings will be published after the conference as a volume of the Springer-Verlag Lecture Notes in Computer Science. There will be a special issue of the journal Discrete Applied Mathematics with papers from the conference.
